

Songwriters Guitar Workshop

With Dave Isaacs

Many singer-songwriters learned guitar as a songwriting tool, and don't consider themselves "guitarists" or even musicians. But while the singer-songwriter's needs are different from those of the professional guitarist, these skills can be developed to as high a degree as any player. Best of all, while there are no "shortcuts", this growth process can start with some very simple concepts.

Even seasoned performers often find themselves looking for new ideas. This workshop explores the singer-songwriter's essential guitar skills, and outlines core techniques for developing and refining guitar parts in ways that support and elevate the song.

The material can be condensed into a 60-to-90-minute presentation or presented over the course of a longer session including individual coaching in front of the group.

Dave Isaacs is known in the Nashville songwriting community as the "Guitar Guru of Music Row" for his teaching and mentoring work with aspiring and pro songwriters and performers.
